

ORX Regional Banking Services

www.orx.org
+44 (0)1225 904 397

With information on more than half a million loss events, our database is still the most comprehensive global loss sharing service for the banking and insurance sectors.

And our regional service helps make the information even more relevant to your firm, with the five services offering Members the chance to analyse loss data against their regional peers in Africa, Australia, Canada, Spain, and UK

Our Regional Services allows Members to share and analyse loss data specific to the region they operate in.

By joining the relevant service you'll benefit from access to targeted sets of data allowing a greater understanding of the losses that have happened in your region. It also allows you to perform focused benchmark reports against your peers.

Each service reflects the culture, legal and political framework, economic cycle, products and businesses.

The same strict data rules of the Global service apply to the Regional Services and a minimum number of participants are required in each region ensuring completely secure and anonymous data sharing.

Benefits

- Benchmark your institution against your peers
- Targeted sets of data allowing for a greater understanding of losses in your region
- Analytics programme can be focused on the requirements of the participants

Features

Focused:

- Data sharing is only within the specific regional service
- Gross income only for that region

Customisable:

- Loss thresholds can be determined
- Business lines can be included or excluded
- Losses can be reported in the regions currency

Confidential:

- Data shared is completely secure and anonymous
- There is a minimum number of participants to ensure confidentiality

Contact:
